Powertec History

Powertec opened its doors in 2013 with owner Daniel Lacovetsky and one apprentice.

In 2014, Daniel took on business partner Will Willams and have seen their staff grow steadily. Many of the original staff are still with Powertec to this day, which speaks to how we take care of our employees.

Today, Powertec offers residential, commercial and industrial installations for electrical and Solar PV. Powertec Solar is the solar energy division of Powertec Electric Inc, which is one of the most trusted electrical company's in Winnipeg. Our projects can be seen across the province of Manitoba

Powertec Core Values

Our biggest focus is and has always been quality of work, strong technical knowledge/understanding, competitive & transparent pricing, but most importantly, exceptional customer service and retention.

We believe that regardless of project size, if you take care of your customers and supply them with superior, friendly service, you'll earn a customer for life. Much of our work being repeat business is a testament to how we take care of our customers and reinforces our customer first mantra.
